Tegar Machfudzi

📌 I'm Tegar Machfudzi, I'm a Java developer. Over 3,5 years of working experience in developing Java Backend. I am good at working with a team. I can understand work quickly and can adapt quickly. Where I work now I work as a backend developer. I work following the direction of the product owner in the team. The job of a backend developer is to provide data or stream data so that it can be displayed or retrieved by the android developer team.

Experience

Photo-in: Event Photography Platform (Freelance Frontend Developer)

▼ **Photo-in** is a digital event photography platform that allows event attendees to search, view, and access their photos using BIB numbers, with a public gallery for event discovery.

Tech Stack: Next.js 15, React 19, TypeScript, Tailwind CSS, Radix UI, tRPC, TanStack Query, Drizzle ORM, LibSQL, NextAuth

- Developed and implemented comprehensive UX/UI redesign across event listing, detail pages, and participant cards menggunakan React 19, Next.js 15, dan Tailwind CSS 4 dengan modern gradient treatments

- Built responsive component architecture (HeroSection, StatsRow, PhotoCollage, EventTypeCard, FilterChips) dengan Radix UI components dan Framer Motion untuk smooth animations.
- Implemented participant page UX improvements termasuk breadcrumb navigation, DOB display dengan react-day-picker, dan enhanced form interactions
- Enhanced public event gallery dengan interactive photo gallery menggunakan react-zoom-pan-pinch, dialog management, dan tRPC untuk real-time data fetching
- Resolved critical timezone bugs dalam DOB verification, implemented Google Drive API integration dengan token refresh logic, dan established multi-tenant workspace scoping

**Software Engineer at PT Innovatz Global | placement at PT PEGADAIAN.
(Oktober 2024 - Present)**

▼ **Management Card BRI**

- Make improvements to the UMI card acceptance feature.
- New feature addition, namely card request on the card management menu. Using java with the vaddin ui framework and java microservice backend.

▼ **Gadai Tabungan Emas Channel**

- Developing a Gadai tabungan emas feature using springboot
- Creating Service inquiry and payment for gadai tabungan emas
- Create a transaction journal for gadai tabungan emas channel

▼ **Bonus Festival Channel**

- Carry out development for the gold savings bonus festival feature for the channel
- Upload files and filter customer KYC data and other validations.

▼ Tarif Khusus Cicil Emas

- Developed and implemented special rate functionality for Tring and BRI mo digital channels as part of Quick Win Program 2026 following Business Summit
- Configured product parameters including base rate reduction (0.92% → 0.53%), down payment options, and tenor adjustments
- Performed system integration across BRI Group ecosystem channels with cross-functional teams (Digital, IT Planning, Application Development, Infrastructure)
- Validated and tested customer eligibility criteria, KYC data filtering, and rate application logic
- Successfully deployed within 8-day timeline, meeting target go-live date of August 7, 2026

Software Engineer at PT Indocyber Global Teknologi | placement at Bank BNI. (Februari 2024 - October 2024)

▼ Direct Debit Backend and Microsite

- Create service Registration Card Using springboot, redis, kafka and oracle database
- Create Service Inquiry and Payment debit springboot, redis, kafka and oracle database
- Create config dev for deploy service in openshift
- Create Unit testing document for delivery project
- Fixing web/microsite direct debit using reactJs

▼ Qris CPM (Costumer Presented Mode)

- Perform maintenance on qris cpm service such as analyzing service speed with jmeter
- Create unit testing normal case and abnormal in qris cpm like generate qr and others

- Make improvements to existing issues

Software Engineer at PT Indocyber Global Teknologi | placement at Anteraja (October 2022 - August 2023)

- Create new features within existing application.
- Make changes to existing features in the applications.
- Look for the root of the problem in errors and bugs in the application
- Discuss the features you want to work on

Junior Software Engineer at Teknologi Inovasi Mandiri (June 2022 - October 2022)

- Gathering information from user for functionality on application
- Develop and add some features on application
- Fixing and handling error and bugs

Skills

- | | | |
|-----------------------------|-------------------|-----------------------|
| • Java | • Mysql | • Redis |
| • Springboot | • Postgresql | • Kafka |
| • Quarkus | • Problem Solving | • RestApi |
| • Oracle Database | • MongoDB | • Git Version Control |
| • Microservice Architecture | • React | • Postman |
| | • TypeScript | • JasperReports |

Education

STMIK BANISALEH (2017 - 2021)

Bachelor's Degree in Computer Science
